## Creating long-term value

Pinnacle House is a selection of contemporary apartments neighbouring the Grand Union Canal in the historic village of Kings Langley. Galliard Homes pride themselves on being forward-thinking and creating functional, sustainable homes. Access International Security were awarded the electrical contract for the development.

## Future-proofing the development

With four EV parking bays adjacent to the building walls, two Scatalo Duo wall-mounted charging units were recommended.

Finished in brushed aluminium with black Perspex panels the Scatalo Duo units are an attractive solution. Each unit supports single-phase power connection with output 3.7W to 7.4W per socket.

With smart online functionality, payment and access to the chargers is via the Sevadis cloud and residents will use RFID cards or the Sevadis App to connect.
