

**SEVADIS**  
POWERING ELECTRIC VEHICLES

**Case Study**  
**HTS Spares**

Rotherwas Industrial Estate, Hereford

## Leaders in construction and plant spares

HTS Spares is a leading supplier of machinery spares and consumable products to construction machinery workshops worldwide. They dispatch hundreds of parcels each day throughout the UK and abroad. HTS are keen to support their employees as they transition to electric vehicles and want to offer ev charging at the workplace.

## EV charging to suit a varied workforce

With a mixture of employees who spend office hours parked and others that are only on the premises for brief intervals, a Sevadis MaxiCharger duo pedestal was installed with one 22kW and one 7.4kW socket.

Power supply at the site is restricted so active load management was installed to monitor total consumption and manage in real time the amount allocated to ev charging.

- ✓ 7.4kW and 22kW sockets for fast charging
- ✓ RFID & Sevadis Cloud management software
- ✓ OCPP 1.6 compliant for software flexibility
- ✓ Active load management to manage power supply
