

Case Study
Steepleton

Pegasus later living apartments in
Tetbury

Redefining later living

Situated in Tetbury, one of the most desirable towns in the Cotswolds, Steepleton, a Pegasus development, is a beautiful collection of 68 independent, later living apartments. The one and two bedroom homes are spread across six buildings connected by garden walkways.

Providing essential EV charging

Two Sevadis MaxiCharger pedestal charging units were installed in parking bays reserved for EV charging only. Steepleton opted for a semi public Sevadis Cloud System set-up to facilitate management and billing of the electricity used for charging.

The MaxiChargers are used by residents and their visitors.

- ✓ 22 kW sockets for fast charging
- ✓ Mobile and RFID fob activated charging
- ✓ Sevadis Cloud to monitor, track & bill usage
- ✓ OCPP 1.6 compliant for software flexibility
