EXPERTS IN EV CHARGING

Sevadis, the UK's fastest growing EV charging solutions provider is dedicated to making EV charging easy, accessible and affordable.

Applying a customer-centric and consultative approach, Sevadis ensures that businesses and EV drivers feel confident in their charging experience.

Sevadis provides a unique blend of industry experts, with over 50 years of collective experience in EV charging, and innovative products; a combination that has earned trust with some of the largest companies across various sectors.

MAKING THE RIGHT CHOICE

Sevadis' vision is a world in which zero-emission vehicles are the norm, and where intelligent charging technology provides drivers with the freedom and confidence to travel when and where they want.

Flexible Solutions

Providing OCPP compliant solutions to meet all requirements, ensuring all EV chargers are fit for the future.

Buy with Confidence

Affordable solutions without compromising on quality, evidenced by industry-leading fault rate.

Credible & Reliable

Chosen partners to blue chip companies and part of the BJA Trading Group (t/o £40m p.a).

Always Available

Extensive stock holding at the Group's multi-site warehouse facilities, allowing for next-day delivery service.

Above & Beyond

Delivering EV charging solutions with customers at the core; no ask is too big, nor too small.

One Step Ahead

Evolving in line with industry trends, standards and requirements with a robust research & development team.

Trusted Experts

Comprising a team of dedicated industry professionals with over 50 years of collective experience in EV charging.

Corporate Social Responsibility

Dedicated to decarbonising the future of transport with a diverse range of expert knowledge.

Making EV charging affordable and accessible is critical to the uptake of electric vehicles. Since 2016, Sevadis has been committed to ensuring that businesses, organisations and EV drivers are provided with the means to recharge their vehicles cost-effectively without compromising on quality.

FOR ALL LOCATIONS, SCENARIOS & BUDGETS

Domestic

For homeowners and rental occupants, Sevadis ensures that charging is made easy, providing peace of mind when charging at home.

Workplace

With an extensive range of charging hardware, as well as software, Sevadis provide employers and employees with easy to manage solutions.

Built Environment

From housing to commercial developments, Sevadis delivers end-to-end solutions for new-build and retrofitting requirements

Fleet

With a combination of AC & DC charging solutions, Sevadis ensures that fleets of all shapes and sizes are fully charged for their electric journeys.

Commercial

Whether it's a retail car park, a hotel, or a leisure destination, Sevadis provides a range of solutions enabling businesses to generate revenue.

Public Rapid

Forecourts, dealerships, public car parks and major depots can all benefit from Sevadis' range of DC rapid charging solutions.

COMPATIBLE WITH ALL EV MODELS

TRUSTED BY BUSINESSES & ORGANISATIONS NATIONWIDE

ELECTRIFYING THE FUTURE IN PARTNERSHIP WITH AUTEL

Together leading the charge with innovative EV charging solutions

The unique partnership between Sevadis and Autel combines EV charging and manufacturing excellence, providing businesses and EV drivers with innovative, smart EV charging solutions.

Together designing and developing the MaxiCharger (AC) specifically for the UK market, Sevadis and Autel have created an affordable, aesthetically pleasing EV charging solution to meet the industry's requirements.

Feature-packed and future-proofed, the MaxiCharger is a proven EV charging solution that has won the prestigious Red Dot Design Award (2022), an accolade representing true quality, optimal functionality and sophisticated design.

Autel's capacity to manufacture 1.2m MaxiChargers annually ensures that the MaxiCharger range is readily available at Sevadis' dedicated UK warehouse.

THE MAXICHARGER (AC)

An all-encompassing EV charging solution, designed for all environments

The MaxiCharger is a smart, single-outlet universal Type 2 socket EV charger. It is OCPP 1.6J compliant, has built-in PME fault detection on single and three-phase connection, and has both static load management and dynamic load balancing capabilities.

The MaxiCharger is a robust, aesthetically pleasing and suitable for all locations. Allowing EV drivers to charge at 7.4, 11 and 22kW charging speeds, the MaxiCharger is an ideal solution for domestic and commercial properties.

Easy To Install, Configure & Use

7.4 kW, 11 kW & 22 kW

Wall & Floor Mounted Solutions

Built-In PME Fault Detection For Single & Three-Phase

Static Load Management Options

Dynamic Load Balancing Capabilities

OCPP 1.6J compliant

RFID and/or Smartphone Activated Charging

Integrated Smart Back-Office Solutions

OZEV Grant Approved

CUSTOMISABLE, FLEXIBLE & MODULAR

The MaxiCharger provides a 'build your own' EV charging solution, allowing a diverse range of wall-mounted and floor-mounted applications, suitable for all locations.

MaxiCharger Wall-mounted

Suitable for domestic applications, including housing developments.

MaxiCharger Pillar

Available in 1way, 2way, 3way & 4way options for workplace and commercial locations.

MaxiCharger Pedestal

Mounted on a universal pedestal, a cost-effective solution meeting budget requirements.

MaxiCharger with LCD Screen

Can be wall or floor mounted. Providing visibility of charging activity & the ideal canvas for commercial advertising.

THE MAXICHARGER (DC)

In partnership with Autel, Sevadis offers DC rapid charging solutions for all project requirements.

From public car parks to dealerships; leisure destinations to operational fleets - the DC rapid charging solutions offer businesses with a range of power outputs to suit all power capabilities.

Using a combination of sealed enclosures, liquid cooling and compact designs, Autel's DC chargers are designed to thrive in any environment and be best-in-class.

40kW - 240kW

Wall & floor mounted solutions

LCD touchscreen

CCS1, CCS2, CHAdeMO connections

Supports RFID, smartphone & credit card payments

OCPP 1.6J compliant

RFID and/or Smartphone Activated Charging

Integrated Smart Back-Office Solutions

BESPOKE BRANDING

Choose from standard MaxiCharger colours, unique RAL colours, or opt for designs suited to corporate brand guidelines.

This offering enables businesses and organisations to represent their brand on their chosen MaxiCharger, whether that be a design on the fascia, or for the MaxiCharger Pillar panels.

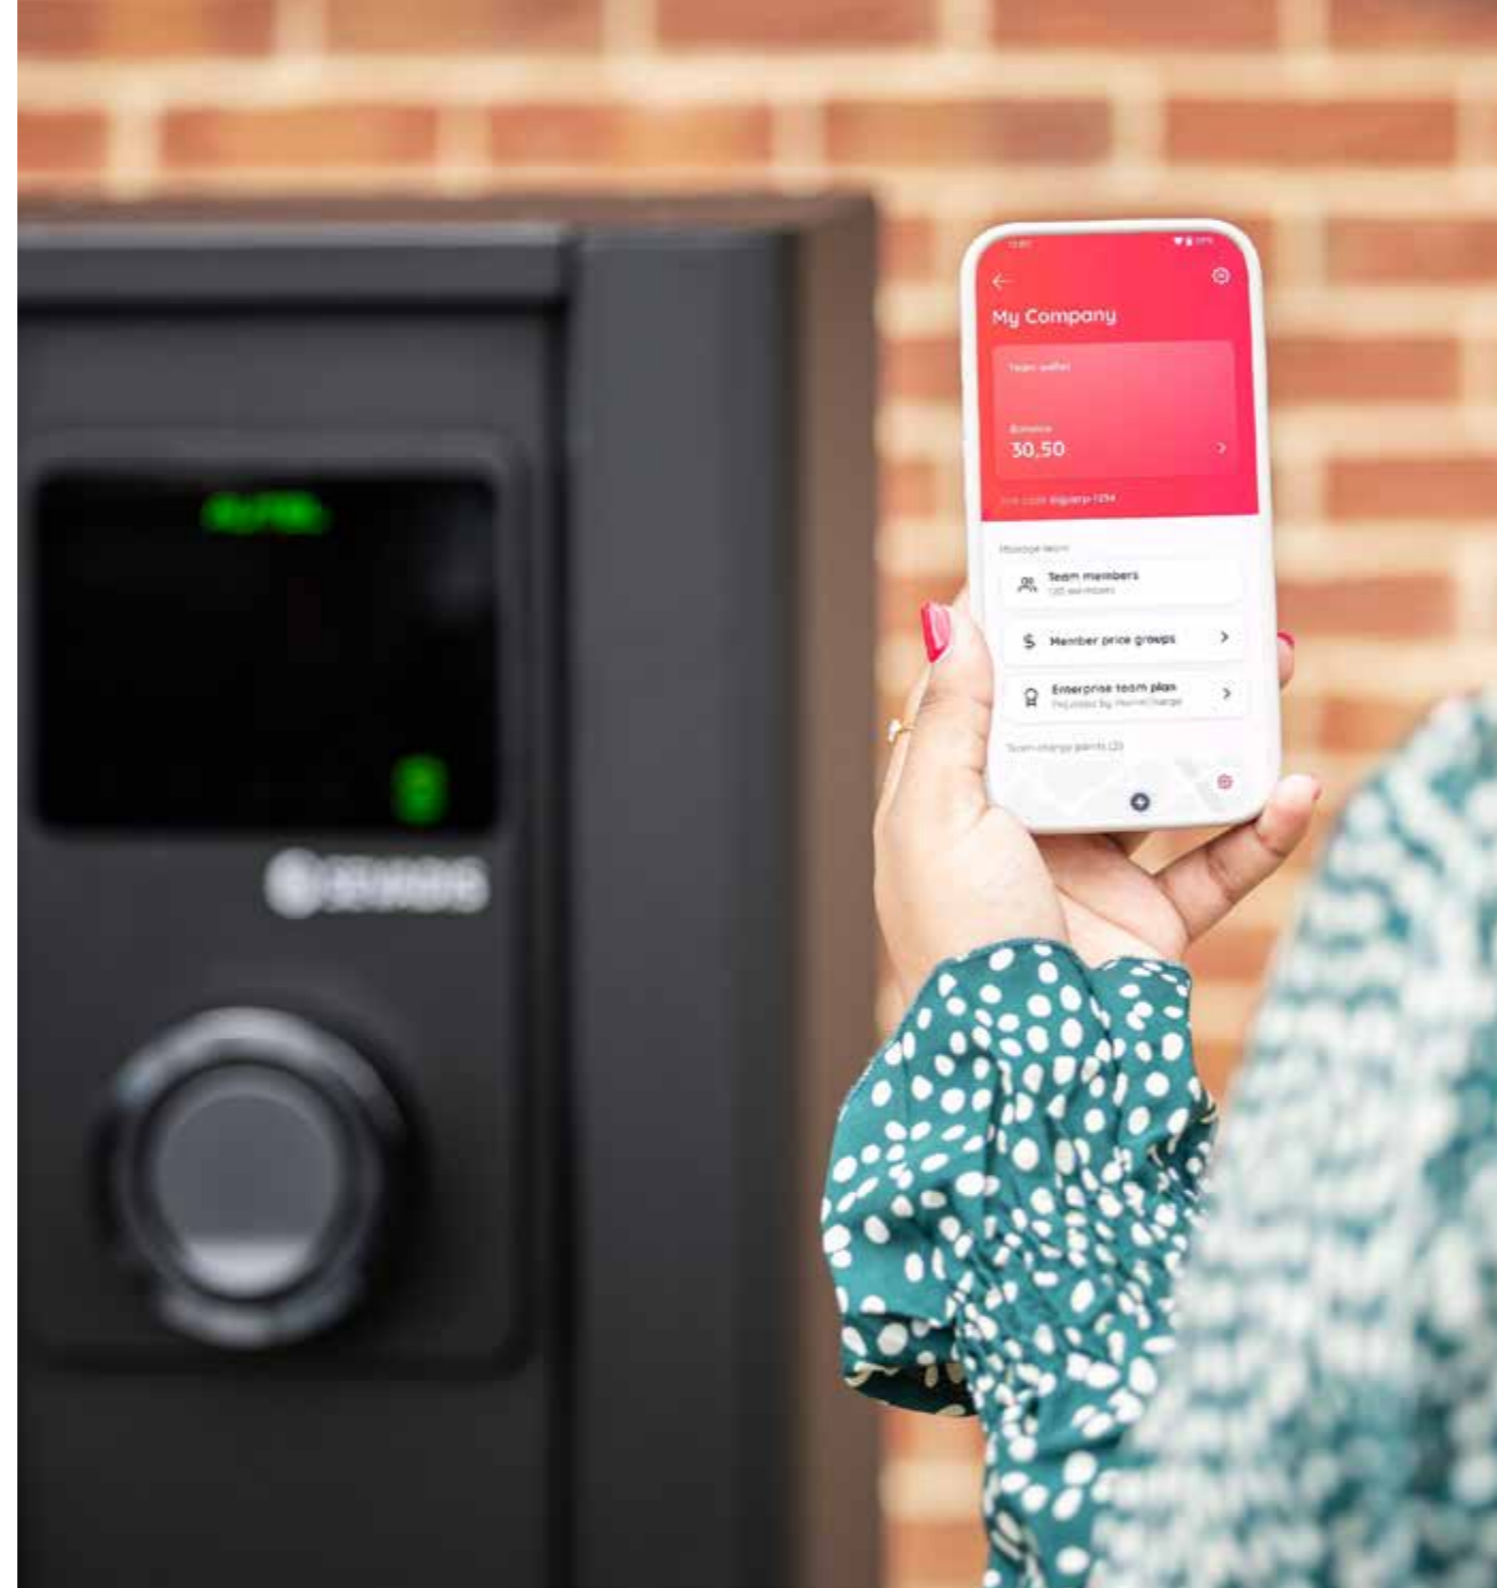

CHARGE SEAMLESSLY, THE SMART WAY

The MaxiCharger range provides an OCPP compliant solution, allowing businesses and EV drivers to integrate with any OCPP compliant smart back-office management system in the industry.

By integrating with a smart back-office management system, businesses and organisations can control and monitor their charging consumption; set user-based tariffs, generate revenue, manage multiple charge point locations and more.

For EV drivers, the integration of a smart back-office management system allows for off-peak charging capabilities, monitoring of charging activity, easy-to-use charging experience via RFID and/or smartphone.
